PRIYANSHI SRIVASTAV

Software Development Engineer |AI/ML Engineer | Full-Stack Engineer | Data Analyst

priyanshisrivastav1@gmail.com | +91 8928569217 | India | LinkedIn | GitHub

PROFESSIONAL SUMMARY

Computer Science postgraduate student pursuing an M.Tech in Computer Science and Engineering (Information Security), with a B.E. in Computer Science and Engineering (Artificial Intelligence & Machine Learning) and an 8.99 CGPA. Skilled in Python, C++, C#, data structures and algorithms, object-oriented programming, databases, and machine learning. Hands-on experience developing computer vision, deep learning, and data-processing projects, with knowledge of software development, testing, debugging, and API fundamentals. Interested in building reliable software applications and AI-driven solutions to solve real-world problems.

EDUCATION

M.Tech – Computer Science & Engineering (Information Security) 2025 – 2027
Manipal Institute of Technology, Manipal

B.E. – Computer Science & Engineering (Artificial Intelligence & Machine Learning) 2020 – 2024
Smt. Indira Gandhi College of Engineering, Mumbai
CGPA: 8.99

PROJECTS

A Study on Semi-Supervised Learning for Sustainable Remote-sensing Image segmentation | Ongoing Research
Python, PyTorch, U-Net, CPS, DL, Computer Vision, Green AI, Kaggle
- Comparing supervised U-Net and multiple semi-supervised learning methods across different labelled-data fractions and remote-sensing datasets.
- Evaluating segmentation performance, labelled efficiency, computational energy consumption and carbon emissions.
- Analyzing class-wise segmentation errors to assess the trade-off between model accuracy and sustainability.

Construction Safety Detection using YOLOv8
Python, YOLOv8, Computer Vision, OpenCV
- Built a real-time computer vision system to detect personal protective equipment (PPE) on construction sites.
- Implemented object detection to identify helmets and safety vests from live video streams.
- Automated safety compliance monitoring to minimize manual supervision.

Real-Time Voice Cloning System
Python, Deep Learning, TensorFlow, Audio Processing, Git
- Developed a real-time deep learning–based voice cloning system for natural speech synthesis.
- Designed end-to-end audio pipelines including preprocessing, feature extraction, and model inference.
- Enhanced speech quality by learning accent variations and speech patterns.

TECHNICAL SKILLS

Programming: Python, C#, C++, JavaScript, SQL

Software Engineering & CS Fundamentals: Data Structures & Algorithms, OOP, DBMS, SDLC, REST APIs, Operating Systems, Computer Networks, Testing & Debugging

Machine Learning & DL: PyTorch, TensorFlow, Scikit-learn, YOLOv8, U-Net, Model Evaluation

Computer Vision & Data Processing: OpenCV, Object Detection, Image Segmentation, NumPy, Pandas, Image processing, Object Detection, Data Transformation

Databases & Data Analytics: MySQL, MongoDB ,Power BI, Microsoft Excel

Tools & Platforms: Git, GitHub, Linux, Jupyter Notebook, Docker, Kaggle, Visual Studio Code

RESEARCH PUBLICATION

Real-Time Voice Cloning System
International Research Journal of Innovations in Engineering and Technology (IRJIET), Volume 7, Issue 10, October 2023

CERTIFICATES

- Artificial Intelligence Fundamentals – IBM
- Data Analytics Job Simulation – Deloitte
